

Dear clients

We stand a chance to use the intelligent technologies for our own needs. Modernizing our companies, we contribute to increase of our incomes and limit our efforts, saving very valuable time and money.

We produce the systems, which are used for random control of workers. We would like to introduce a great method of attempted theft elimination, which may take place in your business area. We have observed, that the awareness of possible control prevents the attempts of deception. Purchase of our devices will limit the losses, which are incurred by your company, as a result of dishonesty of your workers.

How does it work ?

Each worker who leaves a working place is asked for pressing a button of the device called „Losomat”. It starts the process which generates: a green light, which means that a worker is free of control, or a red light- a necessity of control. Each light signal is additionally intensified with a proper sound.

A system administrator may set the probability of control. The following values may be set: 50%, 40%, 35%, 30%, 25%, 20%, 15%, 10%. We also offer a possibility of changing a programme depending on your needs.

The system is expanded with an option of additional button or infrared barrier connection, which enables an automatic lottery- drawing after crossing the ray- also for the cars.

The function of „control extortion” is built- in some models- in case of a suspicion of theft, a security guard uses the special button located in the panel of the device.

Our offer is flexible and fitted to your needs.

We offer seven models of our product, starting from the simplest- autonomous (LS2, LS3); extended, with „control extortion” function (LS4 and LS5); portable, battery- powered (LS6 and

LS7); and the most precise, which cooperate with the access control, which can independently control the gates or other automatic passages.

We have big experience in production and sale of such devices. It is our pride and motivation for the further development. The best and well-known concerns and distributive networks, such as: Leroy Merlin, Auchan, Media Markt, Real, Castorama, Makro Cash&Carry cooperate with us. We are absolutely convinced of perfect working of our devices giving 3 years guarantee for each product.
